

UNISON CORPORATION

OPERATE YOUR UNISON CNC GRINDERS 24/7, ANYWHERE, ANYTIME WITH OUR NEW FEATURE CALLED

"REMOTE CONNECT"

Unison's latest software feature called **Remote Connect** allows you to operate your Unison Grinder wirelessly from a smart phone, tablet or computer -- anywhere, anytime, 24/7!

Now you can know the status of your Unison grinder with a glance at your computer, tablet or smart phone. Unison's Remote Connect informs you through email and/or text messages in the event an issue should arise during unattended "lights out" grinding.

Machine problems can often be troubleshot remotely by using the software's built-in diagnostics and also tool grinding programs can be fixed remotely as well. The Remote feature includes a high definition webcam and headphones with a noise cancelling microphone to facilitate communication between a remote location and a customer's factory

Model 1500 CNC Punch/Profile Grinder featuring a new polymer cast base which offers significant dampening characteristics improving the part finish and the dimensional accuracy of your tools.

Model 2150 CNC DedTru Grinding System offers simple Blank Preparation as well as CNC Centerless Grinding ID, OD & Profile Grinding.

Model 2650 CNC Cutting Tool/Burr Grinder is a high precision machine designed for volume production with an automatic loading/unloading system for unattended parts manufacturing of industrial, surgical burs and dental tools.
