The New Unison Corporation

NEWS RELEASE

Contact: Mark Hancock

FOR IMMEDIATE RELEASE:

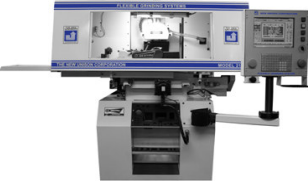

Ferndale, Michigan September 18, 2013 – Unison Corporation

The following advertisement was displayed on page 99 of the September 2013 issue of Cutting Tool Engineering Magazine:

UNISON CORPORATION

MANUFACTURER OF THE ORIGINAL DEDTRU

The Model 2150™ CNC DedTru is a 3-Axis Grinder which can be adapted for either precise centerless OD or ID grinding as well as surface grinding.

A DEDTRU MAKES PROFILE GRINDING EASY

CUSTOM PROGRAM	SINGLE STEP	STEP WITH RADIUS	STEP WITH TAPER
DUAL STEP BLANK	TRIPLE STEP	TAPERED BLANK	RADIUS CORNER
DEEP RAD CORNER	CONV RADIUS BLANK	RADIUS W/ TAPER	TAPER TAPER
TAPER BALL END	STEPPED BALL END	CUSTOM PROFILE	

A DedTru System allows you to grind precise profiled blanks with virtually no shank run-out and also eliminates the requirement for indicating parts in your flute grinders. When using the Model 2150 DedTru to profile blanks, you decrease overall grind cycle time and increase the productivity of your 5 axis grinders.
